Annual Report for Educational Technology

The Educational Technology committee (also known as FETC) met three times in 2019-2020. In the Fall Semester, the committee chair had difficulty arranging a time for everyone to meet in October and the committee met only once, in November. A meeting was set in January to hear about OER (open educational resources) but the guest speaker was unable to attend, although other business was conducted, as detailed in the attached minutes. The pandemic delayed the calling of a second meeting, which was held in April; the committee got an update on OER and elected a new chair for 2020-2021 (with the same secretary going forward).
